SUBHAM SINHA

Full Stack Developer (MERN)
Siliguri, India | sinhasubh2000@gmail.com | +91-8372814383 | GitHub | LinkedIn

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer (MERN) with hands-on experience building scalable, production-ready web applications using React.js, Node.js, Express.js, and MongoDB. Skilled in RESTful API design, JWT authentication, and third-party integrations (Stripe, Razorpay, Cloudinary). Built resumeFit, an AI-powered resume-to-job-description gap analysis platform, and solved 200+ DSA problems on LeetCode/HackerRank. Passionate about writing clean, scalable code and delivering high-impact solutions. Currently interning as a Full Stack Developer at BookMyWarehouse.

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern | BookMyWarehouse Sept 2026 – Present

Project: Retail Holiday & Flash-Sale Floor Staff (on-demand retail staffing platform)

- Working on a platform that supplies trained sales assistants and cashier backups to malls during peak holiday and flash-sale periods.
- Researched competitor products and documented requirements (features, users, and business needs) to define the scope of the platform.
- Designed the system architecture and selected the tech stack (MERN: MongoDB, Express.js, React.js, Node.js) for the application.
- Developing the platform's frontend and backend using React.js, Node.js, Express.js, and MongoDB.

TECHNICAL SKILLS

Languages: C, C++, JavaScript, Python
Frontend: React.js, Redux Toolkit, HTML5, CSS3, JavaScript (ES6+), Bootstrap, Tailwind CSS
Backend: Node.js, Express.js
Databases: MongoDB (NoSQL), MySQL, PostgreSQL (SQL)
Tools & Deployment: Git/GitHub, Postman (API Testing), Vercel
AI & Emerging Tech: Google Gemini API, Natural Language Processing (NLP), Prompt Engineering, LangChain, open-source AI models (e.g., DeepSeek) via Hugging Face, Agentic AI development (learning)
Document Processing: pdf-parse, Mammoth (PDF/DOCX parsing & text extraction)
Specialized: JWT Auth, Bcrypt, REST API Design

TECHNICAL PROJECTS

resumeFit – AI-Powered Resume & Job-Fit Analysis Platform | Live Demo MERN Stack, Gemini API, JWT

- Developed a full-stack MERN application (React.js, Node.js, Express.js, MongoDB) that allows users to upload a resume, job description (JD), and self-description for automated skill-gap analysis.
- Integrated the Google Gemini API for Natural Language Processing (NLP) and prompt engineering to compare resume content against job requirements, identify missing skills/keywords, and generate a personalized preparation plan.
- Implemented resume parsing and text extraction from PDF/DOCX files using libraries such as pdf-parse and Mammoth, and built dynamic, JD-tailored resume generation with a downloadable output.
- Built secure JWT-based authentication and RESTful APIs to manage user accounts, uploads, and analysis history stored in MongoDB.

Forever – E-Commerce Platform | Live Demo MERN Stack, JWT, Stripe/Razorpay

- Developed a full-stack e-commerce platform using React, Node.js, Express, and MongoDB with JWT authentication and role-based access for Admin and Users.
- Built shopping cart, product catalog, order management, and payment workflow integrated with Stripe and Razorpay.
- Integrated Cloudinary for product image uploads and designed a responsive UI with Tailwind CSS.
- Developed and tested REST APIs (Postman) for authentication, products, carts, and orders; deployed frontend, admin, and backend separately on Vercel.

EDUCATION

Bachelor of Science (Computer Science) – Siliguri College, North Bengal University 2017–2020

Percentage: 74.13%

ACHIEVEMENTS

- Solved 200+ problems on LeetCode/HackerRank focusing on Data Structures and Algorithms.
- Cleared 4 State Level Government Exams.
